

Knight Global MJBA2300/ MJBA2600/ TJBA2600 Jib Crane

The upper column (Figure 1) and base assembly (Figure 2) are separate components and designed so the inner tube seats onto a rotating pin assembly located inside the outer post base (Figure 3). The upper column slides into the base assembly without any fastening or securing.

Information in this Illustration is accurate at the time of posting. Please contact a Knight Representative to verify all product information.
