**Tables/  
Lift Platforms**

VER. 12/12

Knight Global Tables are ergonomically designed for easy loading and unloading of materials. Lift Tables are available in various styles, lift capacities and controls that will accommodate the needs of the application that your company is looking for. Lift tables incorporate the use of pneumatic control technologies, which makes the table operation cleaner, simplifies spare parts inventories and reduces general maintenance. Our exclusive Knight Global air bag design offers high durability and resistance to wear.

Lift tables are available in a variety of configurations to accommodate every application need. All lift tables come equipped with hydraulic steel fittings and stainless steel braided hydraulic hosing for increased durability. Polished chrome shafts are used at all slide and pivot points to minimize the wear and prolong component life.

Maintenance Lock-Out Bars are standard on all tables. All tables are inspected and tested before they leave our facility.

## Lift Table Features

- Lift, Lift and Rotate, Tilt, Lift and Tilt, Corner Tilt, Slide Tilt, Double Scissor Lift, Load Sensor, Zero Load Zero Lift and Turntable Configurations Available.
- Steel Construction.
- Maintenance Lock-Out Bars.
- Stainless Steel Hydraulic Hosing.
- Heavy Duty Pneumatic Air Bags.
- Manual Pedestal or Foot Control.
- Bolt-on Hand Control.
- Polished Chrome Shafts at all Pivot and Slide Points.
- Maximum Capacity: Up to **8,000 lbs [3629kg]**.

## Lift Table Options

- Steel Risers.
- Pit Mounted (Angled Toe Guards, External Mounted Pit Guards or Auto Safety Bars are required).
- Corner Gusset Tabs (No Extra Charge).
- Ratchet Safety Stops.
- Bellows Skirting.

## Lift Table / Platform Series

**Standard Lift**

Lift table raises loads to the proper ergonomic height for the operator. Lifting capacity up to 8,000 lbs [3629kg].

**Model# L3636-2000 (Shown)**

**Lift and Rotate**

Rotate table raises loads to the proper ergonomic height and provides up to 360° of rotation. Lifting capacity up to 8,000 lbs [3629kg].

**Standard Tilt**

By tilting container forward, the table positions dunnage for easy loading or unloading. Lifting capacity up to 8,000 lbs [3629kg].

**Lift and Tilt**

Lift and Tilt table will raise loads to ergonomic heights and provides a tilting table top. Lifting capacity up to 6,000 lbs [2722kg].

**Note:** Table and Lift Platforms are available with a variety of accessories, safety features and equipment. Optional Safety Equipment including but not limited to; perimeter fence guarding, bellows skirting, safety mats, audible signals, light signals, toe guards, special control guarding, etc. are not included unless otherwise stated in the product descriptions. Please check with your state, local or plant safety for requirements. Please contact your local Knight Global representative for more detailed information. Knight Global will be happy to quote any and all safety equipment needed to meet your requirements.

**Slide and Tilt**

Maintains clearance on the operators and unload side of the table. Lifting capacity up to 8,000 lbs [3629kg].

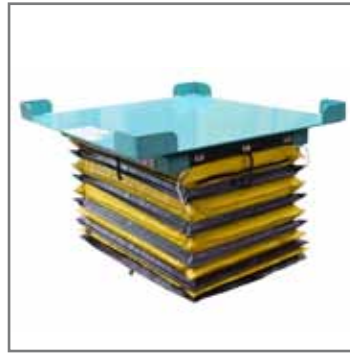

Model# ST5560-4000 (Shown)

**Corner Tilt**

Corner tilt table, tilts and positions a pallet or basket to the operators working level. Lifting capacity up to 4,000 [1814kg].

Model# CT3636-4000 (Shown)

**Load Sensor Lift**

Maintains loads at a safe ergonomic working height during varying weight load exchanges. Capacity up to 4,500 lbs [2041kg].

Model# LS4343-4500 (Shown)

Custom Built

**Air/ Hydraulic Lift and Rotate**

Air and hydraulic operated for the applications that need the rigid actuation that hydraulic provides.

Model# LR4860R-200H (Shown)

**Double Scissor Lift**

When extra lift is needed to raise loads to a higher and safe ergonomic height. Capacity up to 2,000 lbs [904kg].

Model# DSL4860-1000 (Shown)

**Turntables**

Supplies loads continuously to an assembly station with one, two or four position configurations. Capacity up to 8,000 lbs [3629kg].

**Portable Lift Table**

Custom portable lift table is mounted to a cart for mobile use. Deck size and lift height will be customized to your application. Capacities vary by application.

Custom Built

**Engine Block Rollover Station Lift**

Lifts, rotates and transfers engine to an assembly station. Capacity up to 4,000 lbs [1814kg].

**Platform Lift**

Platform lifts the position of the operator in an ergonomic manner within a workstation. Pneumatic or hydraulic lifts available. Capacity up to 2,000 lbs [904kg].

**Zero Loader**

Designed for ground level lifting and loading with a pallet jack when fork truck access is limited. Capacity up to 4,000 lbs [1814kg].

Model# TZ4860-2000 (Shown)

**Zero Lift Loaders**

Combines the convenience of ground level loading with the footprint of a standard lift table. Capacity up to 4,000 lbs [1814kg].
